Cultural Corner

John Logie Baird

John Logie Baird, (13 August 1888 – 14 June 1946) was a Scottish inventor, electrical engineer, and innovator who demonstrated the world's first live working television system on 26 January 1926. He went on to invent the first publicly demonstrated color television system and the first viable purely electronic color television picture tube. In 1928 the Baird Television Development Company achieved the first transatlantic television transmission. Baird's early technological successes and his role in the practical introduction of broadcast television for home entertainment have earned him a prominent place in television's history.

In 2006, Baird was named as one of the 10 greatest Scottish scientists in history, having been listed in the National Library of Scotland's 'Scottish Science Hall of Fame'. In 2015 he was inducted into the Scottish Engineering Hall of Fame. In 2021, the Royal Mint unveiled a John Logie Baird 50p coin commemorating the 75th anniversary of his death.

Cheering Others' Success

District School Boundary Revisions

Clovis Unified school attendance boundaries are in the process of being revised in the anticipation of the 2025 opening of a new high school area. Initial drafts of updated maps are now available online for review. Maple Creek is anticipated to experience changes under the proposals. There is expected to be a new portion of attendance boundary added to our school. There will be a Community Meeting for the Clovis West Area from 5:30-7:00 PM in the high school MPR on Wednesday, January 31st. At the meeting, more details will be provided, and feedback will be collected. To learn more, access comment form and stay updated, visit cUSD.com.
